# Varun M D

**Software Engineer — Node.js | Express.js | REST APIs | MySQL | Redis | Kafka | AWS**

+91 7306538267 | varundinu88@gmail.com | Bengaluru, India | LinkedIn | Portfolio

## PROFESSIONAL SUMMARY

Software Engineer with 5+ years of backend experience building and scaling REST APIs and event-driven services in Node.js and Express.js, backed by MySQL, Redis, Kafka and Elasticsearch. Cut API response times from 450ms to 180ms, improved search speed by 60%, and ran services on AWS at 99.9% uptime. Led a 5-engineer team through 12+ production releases and raised code quality through reviews and modular architecture standards.

## TECHNICAL SKILLS

**Backend:** Node.js, Express.js, REST APIs, PHP, CodeIgniter

**Authentication & Security:** JWT, OAuth

**Languages:** JavaScript, PHP, Python

**Databases & Search:** MySQL, PostgreSQL, Elasticsearch

**Messaging & Caching:** Kafka, BullMQ, Redis (caching, session management)

**Cloud & Deployment:** AWS (EC2, S3, RDS), Railway, Cloudflare (Tunnel), Nginx

**AI & Automation:** LLM-based workflow automation, RPA, Voice automation (Asterisk, RTP, STT/TTS)

## PROFESSIONAL EXPERIENCE

**Kyurius Tech Studios — Bengaluru, India** *Oct 2021 – Present*

*Software Engineer*

- **Performance:** Reduced average API response time from 450ms to 180ms on REST services handling 5,000+ requests/day, using Redis caching and session management with BullMQ/Kafka for queue-driven, event-based processing.
- **Search & security:** Built Elasticsearch-backed search across core services (60% faster responses) and implemented JWT authentication that closed session-hijacking and token-replay gaps.
- **Cloud & cost:** Deployed and scaled services on AWS (EC2, S3, RDS), reaching 99.9% uptime and cutting hosting costs by 20% through right-sizing and caching.
- **Leadership:** Led a 5-engineer team across 12+ production releases; introduced code review and modular architecture standards that reduced deployment issues by 30%.
- **AI automation:** Built LLM-powered automation systems for support email and insurance underwriting workflows (see projects below); manual response time cut from 4 hours to 15 minutes per batch.

## SELECTED PROJECTS

- **Asianet Cable Network – Support Email Automation:** LLM-powered RPA that parses and resolves 9,000+ support emails/month without manual intervention.
- **Insurance Underwriting Automation:** AI-assisted document validation and data extraction pipeline (RPA + LLM), cutting underwriting turnaround from 5 days to within 1 hour.
- **Sri Sri Gaushala (Art of Living) – Milk & Sweets Ordering Platform:** Node.js/Express REST APIs for products, cart, customers and orders; Kafka-based event processing for order, payment, inventory and notification workflows.
- **Chempure.in (B2B e-commerce):** Designed backend APIs and database architecture; optimised queries to cut average page load time by 40%.
- **Kyurius.tech / Chemquire.com** – Developed backend services, REST APIs, and business logic to support corporate and product-driven web platforms
- **iMaze & Impact Apps (Android & iOS):** Backend APIs and integrations supporting 1,000+ mobile users across two cross-platform apps.
- **Kyurius Voice:** Voice automation platform using Asterisk, RTP streaming and STT/TTS with LLM-driven conversation logic; automated 100+ calls/month and cut average handling time by 35%.

## EDUCATION

**B.Tech in Electronics and Communication Engineering** *2015 – 2019*

APJ Abdul Kalam Technological University (KTU)
